

# DVT3.60 — 3.140 Series

## 100% OIL-LESS COMBINATION PRESSURE / VACUUM PUMPS

Becker proudly introduces the next generation of 100% oil-less combination pressure/vacuum pumps for the graphic arts industry—the DVT 3.000 series.

DVT pumps are standard equipment on many OEM products, and are ideal for replacement of virtually any other brand—even oil-lubricated pumps. All our DVT pumps are *totally oil-less*. There is never any oil in the blast air to contaminate your product.

Becker designed these pumps for the toughest applications on the most modern printing presses and bindery equipment. Not only has their ruggedness been improved, but, we also succeeded in designing pumps that are more efficient. Each model provides the same flow as its predecessor, but with less power consumption.

DVT pumps provide plenty of blast air and suction, and are supplied with regulating valves for both as standard equipment.

# NO OIL!

These pumps have improved cooling systems to ensure that they survive applications that would destroy ordinary pumps. These pumps operate cooler than the previous version. In addition, a built-in aftercooler produces cooler discharge air, which minimizes static electricity build-up.

Built-in *oversized* inlet filters for both the primary and second suction remove dust and dirt present around the pressroom equipment. A large discharge filter removes all carbon dust from the blast air so that there is no contamination of printed material.

The DVT series pumps are designed with convenience and minimum maintenance in mind. All regulating valves and all filters are on the *same* side of the pump. The inlet filters and the discharge filter housing are revealed by removing a cover plate with several large knobs. Checking or changing the vanes is a simple operation that takes only a few minutes.

Becker DVT pumps have easy access to the oversized suction and blast filters. Checking and changing vanes takes only a few minutes.

**TECHNICAL DATA**

All data based on 60 Hz operation

	DVT 3.60	DVT 3.80	DVT 3.100	DVT 3.140
Horsepower	5	5	7½	10
Speed (RPM)	1740	1740	1740	1740
