ULTRAPROBE 9000

Digital Ultrasonic Inspection System with the feel of Analog...versatile and easy to operate!

The Ultraprobe® 9000 is a digital ultrasonic inspection, information, storage and retrieval system that's versatile and easy to use (most operators learn within 15 minutes!). This Ultraprobe will help move you through inspections quickly. Whether used for trouble-shooting or a pre-planned route, data is easily viewed on the display panel and stored with the push of a button.

The easy-to-read display panel offers calibrated decibel readout and a

Scale is in calibrated decibels traceable to NIST

16-segment bar graph, which instantly registers sound intensity changes and simultaneously registers peak hold as you scan.

The Ultraprobe 9000 engineering combines the best of both worlds:

- Scans as quickly as with analog instruments
- Uses the digital information to store and trend

On board data logging utilizing
Ultratrend DMS™ (Data
Management System) provides:

- Multiple data views
- History table/spread sheets
- Trend charts
- Export files to MS Excel
- · Flexibility as never before!

UE Systems' unique Spin and Click™ technology makes sophisticated inspection simple and quick!

You'll be amazed at how much you can accomplish with only 2 controls. By just "spinning" and "clicking" you can:

- Locate and identify potential problems
- Store data
- Change frequency and sensitivity quickly
- 🍹 Download data via RS232 output
- Adjust basic operation modes
- Select "snap shot" function...and more!
